

Avcomm Fire/Safety Intercoms

Full featured intercoms provide unmatched versatility and performance.

SC810R

AVCOMM SC810R INTERCOM

Powerful clear communications, innovating design, and absolutely the easiest intercom installation ever! The AVCOMM SC810R intercom features a slim-line remote head, perfect for installations with limited space. Exclusive EasyLink™ components quickly connects 2 to 6 crew positions and 2 pump panel positions with two radios and a cell phone. Radio connections with dual audio adjustment are transformer based for compatibility with any manufacturer's handheld or mobile radio.

SETUP IS SIMPLE

AVCOMM EasyLink™ jack boxes provide the connections for a highly flexible intercom system that can be easily expanded or modified for additional positions or remote PTT's. AVCOMM EasyLink™ jack boxes are pre-wired and pre-assembled to eliminate tedious soldering and feature positive-lock connectors to link headsets and radios easily. What's more, you can integrate virtually all major brands of FIRE/SAFETY headsets – a feature not available anywhere else! See reverse side for the complete line of AVCOMM EasyLink™ jack boxes.

RUGGED CONSTRUCTION

Designed to withstand extreme conditions, the SC810R features a solid extruded aluminum framework to dramatically reduce RF interference, thermoplastic elastomer gaskets to seal out moisture and dust, an easy-attach U-bracket mounting, cutting edge circuit design for outstanding audio performance, ceramic hybrid IC chips for high reliability, and rugged cables with polyurethane insulation, foil wrapped to reduce RF interference.

HIGH VOLUME SETTING

AVCOMM SC810R has a special 12dB high volume setting for extreme noise conditions.

ADDITIONAL FEATURES

Separate speaker and microphone controls for each radio, cell phone connection with settings for ALL position or co-driver isolate, co-driver priority PTT, adjustable squelch control, power transmit LED with 'stuck-mic' indicator, Audio IN with auto muting and Record OUT.

SC810R

Intercoms Made Easy

Exclusive EasyLink™ design means you can expand or make changes in a snap! Everything comes pre-wired and pre-assembled for quick and easy system modifications.
